INTEREST

Fashion Art Nature

PROFILE

Recently gratuated of a Bachelor of Interior Design (Residential) from Billy Blue College of Design (Torrens University), I believe design should be functional, aesthetically pleasing and meaningful.

Producing consistently high, professionnal standard of work is important to me as I have a strong work ethic. Being curious about our world, and environment is a strong inspirational source. Learning, asking questions and evolving is also some of the qualities I values.

Arrived in Australia 4 years ago for a year of travel and self-growth, I found in interior design the perfect combination of being challenged, work for a customer, constant evolution, creativity and aesthetic. Having done competition in equestrian jumping since my young age, training, patience and team work to aim for excellence are part of me.

I am looking to immerse myself in an environment where my passion for design will become professional, and my skills refined and improved... My goal is to keep learning and contributing in the design industry mostly in high-end residential
